

Update: April 12, 2020

This is an update to our website update from yesterday.

This update is to alert you that as of late on April 11, 2020 we learned that a second of our residents developed COVID-19. We are actively monitoring our residents for signs and symptoms of COVID-19 and are working with our local and state health departments. Both residents are receiving care at our local acute hospital.

We are acutely aware that these are tough times for everyone. As you know, our priority is protecting our residents and staff from the Corona Virus, and thus we continue to implement our infection control practices and cleaning processes.

We will send updates at least weekly in addition to important news as it occurs. Please check the website often to see if there are any updates related to the COVID-19 situation on the Friends House campus. Our residents and staff receive copies of these updates.

The website is <http://www.friendshouse.com/>
